

Highlights 2013 Anesthesiology and Emergency Medicine

LARYNGOBLOC™

Fiberoptic LED Laryngoscope for single use

Special Features:

- Blade and handle are made from one piece and therefore more robust than conventional single use blades
- Handle protects LED Insert
- Outstanding light quality due to LED technology
- Reusable LED battery insert
- Minimizes risk of contamination
- Available in five different sizes
- Polypropylene Bloc: no deformation, no sensitivity to cold temperatures, excellent rigidity
- Blades are clean packed acc. ISO class 8 (DIN EN ISO 14644-1)

Size	Description	Standard Handle	Short Handle
4 <i>Slim Design*</i>	MACINTOSH	8512 A	8512 AS
3 <i>Slim Design*</i>	MACINTOSH	8512 B	8512 BS
2	MACINTOSH	8512 C	8512 CS
1	MILLER	8530 D	8530 DS
0	MILLER	8530 E	8530 ES
long	LED Battery Insert (2 Batteries)	8547 HL	
short	LED Battery Insert (1 Battery)		8547 HS

* Slim Design: thinner blade, especially for Difficult Intubation (obesity, pregnancy, reduced mouth opening)

8400 A **Bag for Intubation Set**, splash-protected
